

WH 85 T - HD

Item no.: 1793

Tiltable wall mount (heavy duty)

WH 85 T - HD is a tiltable wall mount for flat screens from 55 to 110" / 140 - 279 cm, which can be used in landscape as well as portrait orientation.

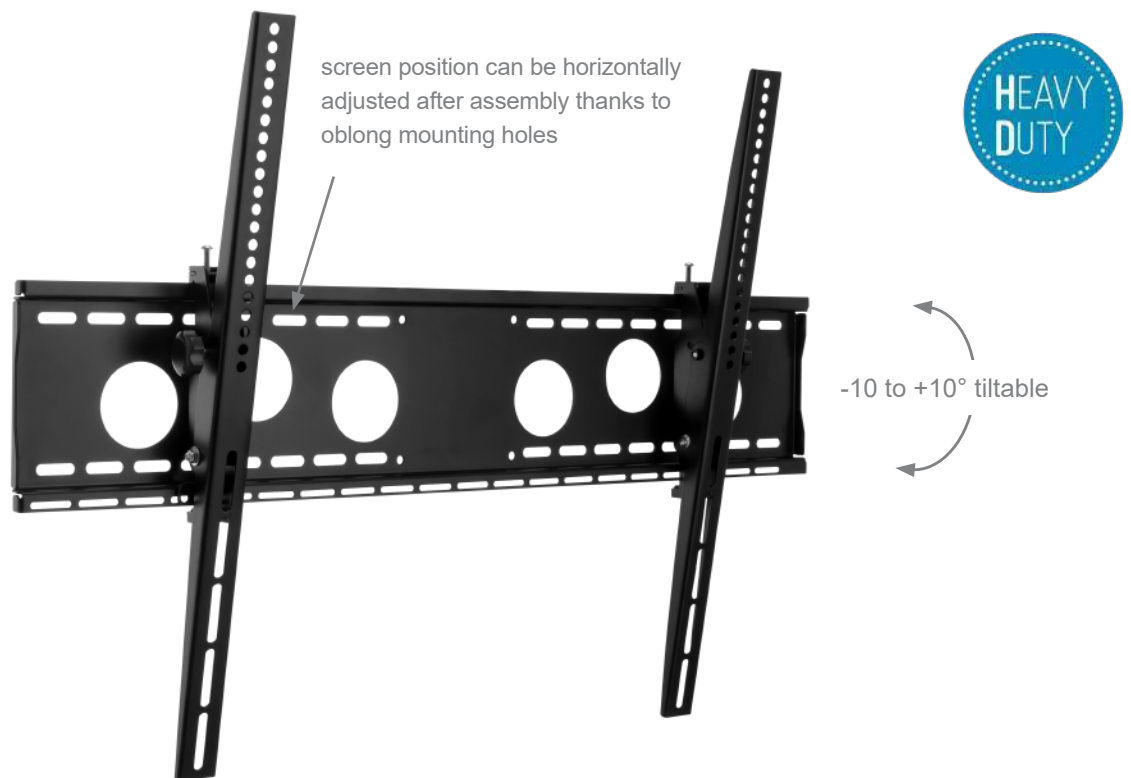

In addition to the standard attachment up to max. VESA 800 x 600 mm the WH 85 T - HD also offers the 125 hole pattern for optional adaptation to HAGOR stand or ceiling systems.

The wall mount is characterized above all by the fact that it is extremely sturdy and, with a maximum load of 125 kg, particularly suitable for very heavy screens.

The holder is impact and scratch resistant powder-coated, black and saves a lot of space due to the small wall distance of just 65 mm.

An integrated bubble level ensures easy installation. In order to be able to set the optimal height, a height compensation of up to 10 mm is possible. The inclination can be flexibly adjusted between -10° and +10°.

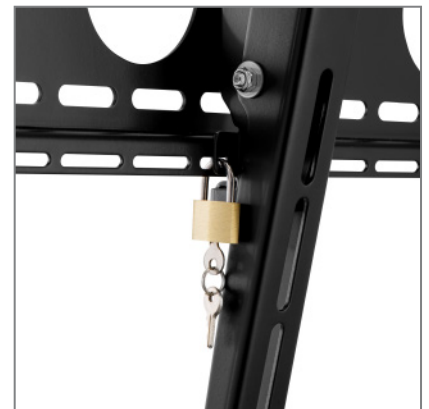

The bracket can be secured against theft with the supplied padlock.

incl. height compensation up to 10 mm

integrated bubble level

incl. optionally usable lock
