

Relay

Quick instructions

Product description

The product is suitable for switching lamps/ lights and other electrical devices.

Description of the symbols

Caution!
Note about hazards

Additional important information

Note about the installation video

⚠ Safety instructions

- ▶ Read this user manual completely before installing or commissioning the device and pay particular attention to the hazard information.
- ▶ The installation of this device and work on the 230 V network must only be carried out by an electrician.
- ▶ The device is not a toy! Do not allow children to play with it. Never leave the packaging material lying around unattended. Plastic film and small parts may pose a danger to children.
- ▶ When remotely or automatically controlling a device, it is not always possible to guarantee that commands are actually executed or that the correct device status is displayed in the app and on other Smart Home display devices because of external circumstances. This may lead to material damage and/or personal injury. Therefore, you must ensure to the greatest extent possible that no person is endangered at the time of remote operation or automated control. Please take special care when setting up or adjusting the remote control or when using the automated control and check the desired functionality at regular intervals.
- ▶ Do not open up the device. It does not contain any parts to be maintained by the user. If a fault occurs, have the device checked by a specialist.

- ▶ We accept no liability for material damage or personal injury which is caused by improper use or failure to observe the safety instructions. In these cases, any guarantee claim becomes void! We accept no liability for consequential damage.
- ▶ For safety and approval reasons (CE/UKCA), the device may not be modified and/or no changes may be made to the device without authorisation.
- ▶ Any use other than that which is described in the user manual is considered improper and leads to the exclusion of guarantee and liability.
- ▶ The device is not suitable for disconnection.
- ▶ Do not use the device if it has damage visible from the outside, for example, to the housing, control elements or connection sockets, or if it has a malfunction. If in doubt, please contact our service team.
- ▶ Only operate the device indoors and do not expose it to moisture, vibrations, constant sunlight or other sources of heat, extreme cold temperatures and mechanical stress.
- ▶ Only use the device together with original components and recommended products from Bosch partners.

i Notes

- ▶ The range within buildings can differ significantly from the range in open spaces. In addition to the transmitting power and the receiving properties of the receiver, environmental factors such as humidity, as well as the local structural situation, play an important role.
 - ▶ The device is only suitable for use in residential environments.
 - ▶ The device is only intended for private use.
-
- ▶ You can also use the explanatory videos and additional information on our website as an additional aid for mounting, installing, starting up and restoring the factory settings on your Bosch Smart Home relay: **www.bosch-smarthome.com/rom/relay**

Product overview

Item	Description
1	System button
2	Status LED
3	Terminals
4	Potential-free contact

The status LED (2) shows the status of the relay module using flashing codes.

Status LED	Device status	Recommended action
Flashes orange	Pairing mode (is active) or device is communicating with the controller	Please wait
Flashes green	Pairing mode (successful) or process confirmed	
Flashes red	Pairing mode (not successful) or process failed	If this is the first pairing attempt, please try again. Otherwise reset the device to the factory settings and contact the service department if necessary.

Notes regarding installation

- ⚠ The standards and directives applicable in your country must be observed during planning, set-up, operation and maintenance.
- ⚠ The device is part of the building installation. Operation of the device is only permitted at 230 V/50 Hz AC voltage. Work on the 230 V network may only be carried out by

an electrician. The applicable accident prevention regulations must be observed here. To avoid an electric shock on the device, please switch off the mains power. Failure to observe the installation instructions may result in fire or other hazards.

-  The applicable requirements must be observed during mounting. Failure to observe the requirements may result in damage to property and/or injury, or even danger of death.
-  Please also note any additional information on the product.
-  A 230 volt alternating current power supply is required for this product (there must be a phase and neutral conductor).
-  The product is only intended for fixed installation in in-wall sockets and junction boxes (in accordance with DIN 49073-1) in indoor areas. For in-wall sockets, please observe the minimum depth of 50 mm and a screw distance of 60 mm.
-  When connecting the device terminals, ensure that permitted wires and wire cross sections are used.
-  The consumers connected to the relay outputs must have sufficient insulation.
-  Observe the technical data, in particular the maximum permissible switching power of the relay and the type of consumers to be connected, before connecting a consumer (see technical data at the end of these instructions). The device should only be loaded to the specified power limit. Overloading may result in destruction of the device, fire or an electrical accident. Among other things, reliable switching off of the connected consumer cannot be guaranteed.

- ⚠ The power circuit to which the device and the load are connected must be secured with a circuit breaker in accordance with EN 60898-1 (trigger characteristics B or C, max. 16 A rated current, min. 6 kA breaking capacity, energy limitation class 3). Installation guidelines in accordance with the applicable national standards, e.g. VDE 0100 or HD384 or IEC 60364, must be observed. The circuit breaker must be easily accessible for the user and labelled as a disconnecter for the device.

Installation

- ⚠ Before you start: Be sure to shut off the power circuit breaker!
- i The device can be used to switch lamps/ lights and other electrical consumers.
- ⚠ The device is not suitable for disconnection.

Connect the controls in accordance with the connection diagram below:

Relay connection diagram

Connection	Description
L	External conductor
N	Neutral conductor
S1	Switch
↑L	Switching input
↓	Switching output

- i** Ensure that the terminal area does not come into contact with the metal parts of the installed device.
 - ⚠** The module may only be used outdoors with suitable protective housings.
- If the module is connected correctly, switch the fuse back on.

Start-up / tuning

Ensure that you have a Bosch Smart Home controller and the Bosch Smart Home app and have successfully configured both. Now start the Bosch Smart Home app and select “Add new device”. Follow the instructions in the app.

Once the module has been switched on via the fuse, it is in pairing mode for 3 minutes. Pairing mode can be started on an unlinked module by pressing the system button (1) again or a connected switch (S1).

Resetting to factory settings

You can reset the device to its factory settings as follows:

Press the system button (1) and hold it for approx. 4 seconds until the status LED (2) flashes orange quickly. Release the system button briefly and press and hold it again until the LED lights green. The device then restarts. Please note that it can take a few seconds until the module is ready for operation again.

 **WARNING** Risk of electric shock.

Follow the rules for live working. Only press the system button with an isolated tool in accordance with EN IEC 60900.

Not observing these instructions can result in death or severe injuries. Work on the 230 V network may only be carried out by an electrician.

 When resetting to factory settings, the settings and information are only lost from the device and not from the Bosch Smart Home controller.

- i** To re-configure the device, first delete it in the device management section of the Bosch Smart Home app and then add it again in the usual pairing process.

Maintenance and cleaning

The device does not require maintenance. Leave any repairs to a specialist.

Simplified declaration of conformity

CE Robert Bosch Smart Home GmbH hereby declares that the radio equipment type Bosch Smart Home BMCT-RZ corresponds with the directive 2014/53/EU. The complete text of the EU declaration of conformity is available via the following web address:
<https://eu-doc.bosch.com>

**UK
CA** Robert Bosch Smart Home GmbH hereby declares that the radio system type BMCT-RZ complies with Regulation 2017. The full text of the declaration of conformity is available at the following internet address:
<https://gb-doc.bosch.com>

Environmental protection and disposal

Electrical or electronic devices, accessories and packaging should be disposed of via an environmentally friendly recycling facility.

Electrical or electronic devices which are no longer usable must be collected separately and disposed of via an environmentally friendly recycling facility (European Directive on Waste Electrical and Electronic Equipment). Use your country's specific return and collection systems when disposing of waste electrical or electronic devices.

In the event of improper disposal, waste electrical and electronic equipment may have harmful effects on the environment and human health due to the possible presence of hazardous substances.

Technical data

Device type designation	BMCT-RZ
Protection class	IP20
Protection class	II
Device protection	Thermal cutoff
Ambient temperature	− 20 °C – + 50 °C
Housing dimensions (W × H × D)	40.5 × 47 × 22 mm
Weight	40 g
Radio frequency band	2.4 – 2.4835 GHz
Radio protocol	ZigBee 3.0
Max. transmitting power	10 dBm
Radio range in the open	< 70 m
Software class	A
Receiver category	2
Supply voltage	230 V _{AC} / 50 Hz
Power consumption in sleep mode	< 1 W
Cable type and cross section	rigid and flexible cable, 0.75 – 2.5 mm ²
Max. switching power:	
	4 A, cos φ 0.85~1
	400 VA
	2,990 W

Technical modifications reserved

Symbol description

	Motors
	LED
	Electronic transformer for low-voltage incandescent bulbs
	Fluorescent lamps
	Ferrite core transformer for low-voltage incandescent bulbs
	Incandescent bulbs
